# Welcome Message

---

## My Dear Colleagues,

Ours is a young community, one that recently weathered a period of unique challenges of an existential nature - COVID-19. Like many of us, I pondered the impact this pandemic would have on the field of thoracic transplantation and wondered if it could endure in India.

Those initial days were difficult to say the least, with the emergence of a hitherto unknown lung disease raising many questions but leaving us with few answers. This novel pathology was so extreme in nature and rapacity that it made a life-saving double-organ transplant commonplace. At the same time, there were organ shortages, travel restrictions, burdensome testing requirements, and barriers to teams travelling to acquire organs. Most insidious of all in a country where organ donation levels are nowhere near where they need to be, there emerged the understandable reluctance to be in hospitals to and or approached for consent.

Yet today, I am proud to say that we as a fraternity have endured and advanced. We've emerged from the depths of crisis and gained much in the way of our understanding of end-stage heart and lung disease, demonstrating greater resilience in using live-saving extracorporeal bridging strategies, and an increased focus on community wellbeing and organ donation after terminal brain death.

As for what is next, I believe that our community should commit to the exigent task of meeting our countries' and the world's need for thoracic transplantation. Doing so will require a focus on developing professionally as individuals and growing our scientific understanding as a collective. Indeed, it is in this spirit that we are attempting to hold an in-person conference - we want those two days to be a collective meeting of minds and joining of wills as we attempt to drive our field forward.

That said, we recognize that your attendance will necessitate navigating the many inconveniences of life in the post COVID era, and we are truly grateful for that fact. This sentiment is especially true when it comes to our respected colleagues from overseas, who have so graciously agreed to share their perspectives on the future of heart and lung transplantation. I am sure they will inspire all those in attendance as much as they have me.

I look forward to meeting you all this first week of December 2022 at the Novotel Convention Center, Hyderabad.
